

VISION

ASHRM is the leader in advancing safe and trusted healthcare through enterprise risk management.

MISSION

To advance patient safety, reduce uncertainty and maximize value through management of risk across the healthcare enterprise.

GOAL

Facilitate effective decision making in the healthcare industry through the application of enterprise risk management.

Enterprise Risk Management

STRATEGIES:

- Establish the core body of knowledge for enterprise risk management.
- Promote the use of enterprise risk management throughout the healthcare industry.

GOAL

Advance patient safety through a value-driven approach.

Patient Safety

STRATEGIES:

- Advocate for laws and policies that benefit patients and enable healthcare to remain safe, viable, sustainable and accessible.
- Lead and support members and stakeholders in implementing best practices in patient safety without compromise.
- Lead and support members' ability to implement a value-driven approach.

GOAL

Be recognized as an influential leader in healthcare enterprise risk management.

Leadership

STRATEGIES:

- Collaborate with targeted, high-impact individuals and organizations that align with or advance ASHRM's vision and mission.
- Become the premier source of evidence-based healthcare risk management research and theory.
- Be recognized for its exceptional programs, services and advances in healthcare enterprise risk management.

GOAL

Have an effective governance and operational infrastructure to ensure necessary resources for execution of its strategic plan.

Governance & Operations

STRATEGIES:

- Have a strong volunteer and governance structure to support organizational sustainability.
- Continue to grow its membership.
- Have a strong internal infrastructure with necessary resources.
- Develop mutually beneficial collaborations between affiliated chapters.

“Safe and Trusted Healthcare”
