American Society for Healthcare Risk Management Announces National Healthcare Risk Management Week Presented by The Risk Authority Stanford

joins other healthcare organizations in celebrating Healthcare Risk Management Week Presented by The Risk Authority Stanford, June 19-23, 2017. This annual campaign from the American Society for Healthcare Risk Management, raises awareness about the critical role risk managers and safety professionals play in patient safety and patient care practices, quality assurance, safe work environments and liability. It also promotes solutions to help prevent some of the most common adverse events.

This year’s theme, Leading Innovation in Risk Management celebrates the unique contributions that health care risk management professionals provide to hospitals and health systems across the country. These innovations are vital in the pursuit of advancing patient safety, reducing uncertainty and maximizing value.

“We recognize that all healthcare workers play a critical role in patient safety, which is why the concept of Enterprise Risk Management is critical. Team work across the healthcare continuum is moving us closer to zero preventable serious safety events,” said _____, _____, and _____.

_____ is celebrating HRM Week with these community events: _____.

###

Established in 1980, the American Society for Healthcare Risk Management is a personal membership group of the American Hospital Association (AHA) with more than 6,000 members representing risk management, patient safety, insurance, law, finance and other related professions. ASHRM promotes effective and innovative risk management strategies and professional leadership through education, recognition, advocacy, publications, networking and interactions with leading healthcare organizations and government agencies. ASHRM initiatives focus on developing and implementing safe and effective patient care practices, the preservation of financial resources and the maintenance of safe working environments.
