

American Society for Health Care Risk Management

**HRM WEEK**  
JUNE 17-21, 2019

**American Society for Health Care Risk Management Announces National Health Care Risk Management Week Presented by The Risk Authority Stanford**

“joins other health care organizations in celebrating Health Care Risk Management Week Presented by The Risk Authority Stanford, June 17-21, 2019. This annual campaign from the American Society for Health Care Risk Management, raises awareness about the critical role risk managers and safety professionals play in patient safety and patient care practices, quality assurance, safe work environments and liability. It also promotes solutions to help prevent some of the most common adverse events.

This year’s theme is Leaders in Safe and Trusted Health Care. The theme celebrates the achievement of all health care risk management professionals; and highlights their leadership in advancing patient safety, reducing uncertainty and maximizing value across the health care enterprise.

“We recognize that all health care workers play a critical role in patient safety, which is why the concept of Enterprise Risk Management is critical. Team work across the health care continuum is moving us closer to zero preventable serious safety events,” said \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.

\_\_\_\_\_ is celebrating HRM Week with these community events:  
\_\_\_\_\_.

For more information, call \_\_\_\_\_ at \_\_\_\_\_.

###

Established in 1980, the American Society for Health Care Risk Management is a personal membership group of the American Hospital Association (AHA) with more than 6,000 members representing risk management, patient safety, insurance, law, finance and other related professions. ASHRM promotes effective and innovative risk management strategies and professional leadership through education, recognition, advocacy, publications, networking and interactions with leading health care organizations and government agencies. ASHRM initiatives focus on developing and implementing safe and effective patient care practices, the preservation of financial resources and the maintenance of safe working environments.
